Dear fellow student,

Welcome to the Econometric Career Days (ECD) 2024! With this profiler, we would like to invite you to this year's edition of the ECD.

Over the past few months, our committee has enthusiastically prepared an event that will allow you to get inspired for your future career through a wide variety of events such as company dinners, presentations and cases, and also more informal fun activities such as a wine tasting. In this way you can create new connections, enjoy a variety of events and be introduced to exciting organizations.

We invite you to explore and pursue your passions under this year's theme: **"Reach New Heights"**. Through this theme, we aim to motivate you to expand your horizons and envision a future with endless possibilities. The events we have lined up are designed to serve as the ideal launchpad for you to achieve your career milestones.

The ECD kicks off on November 12th with the ECD Talks, where we will explore the topic **"Decoding Democracy: How Data Shapes Political Outcomes"**. Join us as experts at the intersection of econometrics, data science, and politics delve into compelling discussions. This presents a unique opportunity to connect to expert analyses on the ongoing presidential election events in the USA, and to enhance your understanding of how data-driven strategies influence political landscapes.

During this week, you have the opportunity to meet more than 40 (inter) nationally operating companies during cases, presentations, workshops and informal activities such as dinners. Additionally, we have organized a Field Trip to The Hague at the Analysis-Information Team of the Dutch National Police and the Ministry of Justice and Safety, where you can delve into the practical applications of econometrics from a national safety perspective.

During the ECD, we also dedicate a special focus to organizations with a positive impact on society during our **Impact Day**. This day showcases the significant contributions of econometrics in fields such as international security and health. This year, the Impact Day is particularly exciting as we introduce the **PhD Drink**, an event designed to bridge the gap between academia and industry by providing insights into career opportunities in econometrics within academia.

All in all, the ECD 2024 promises the opportunity to expand your professional network, explore diverse industries and elevate your career to reach new heights. This profiler provides a detailed overview of the program and the participating companies, allowing you to find out what the ECD can mean for you. Make sure you are ready to reach new heights when the applications open on **October 9th**, and have your CV ready. For more insights and updates, follow us on Instagram ([@ecdrotterdam](https://www.instagram.com/ecdrotterdam)) and visit our website at [ecdrotterdam.nl](https://www.ecdrotterdam.nl). If you have any questions, please do not hesitate to contact us.

We look forward to welcoming you at the ECD 2024!

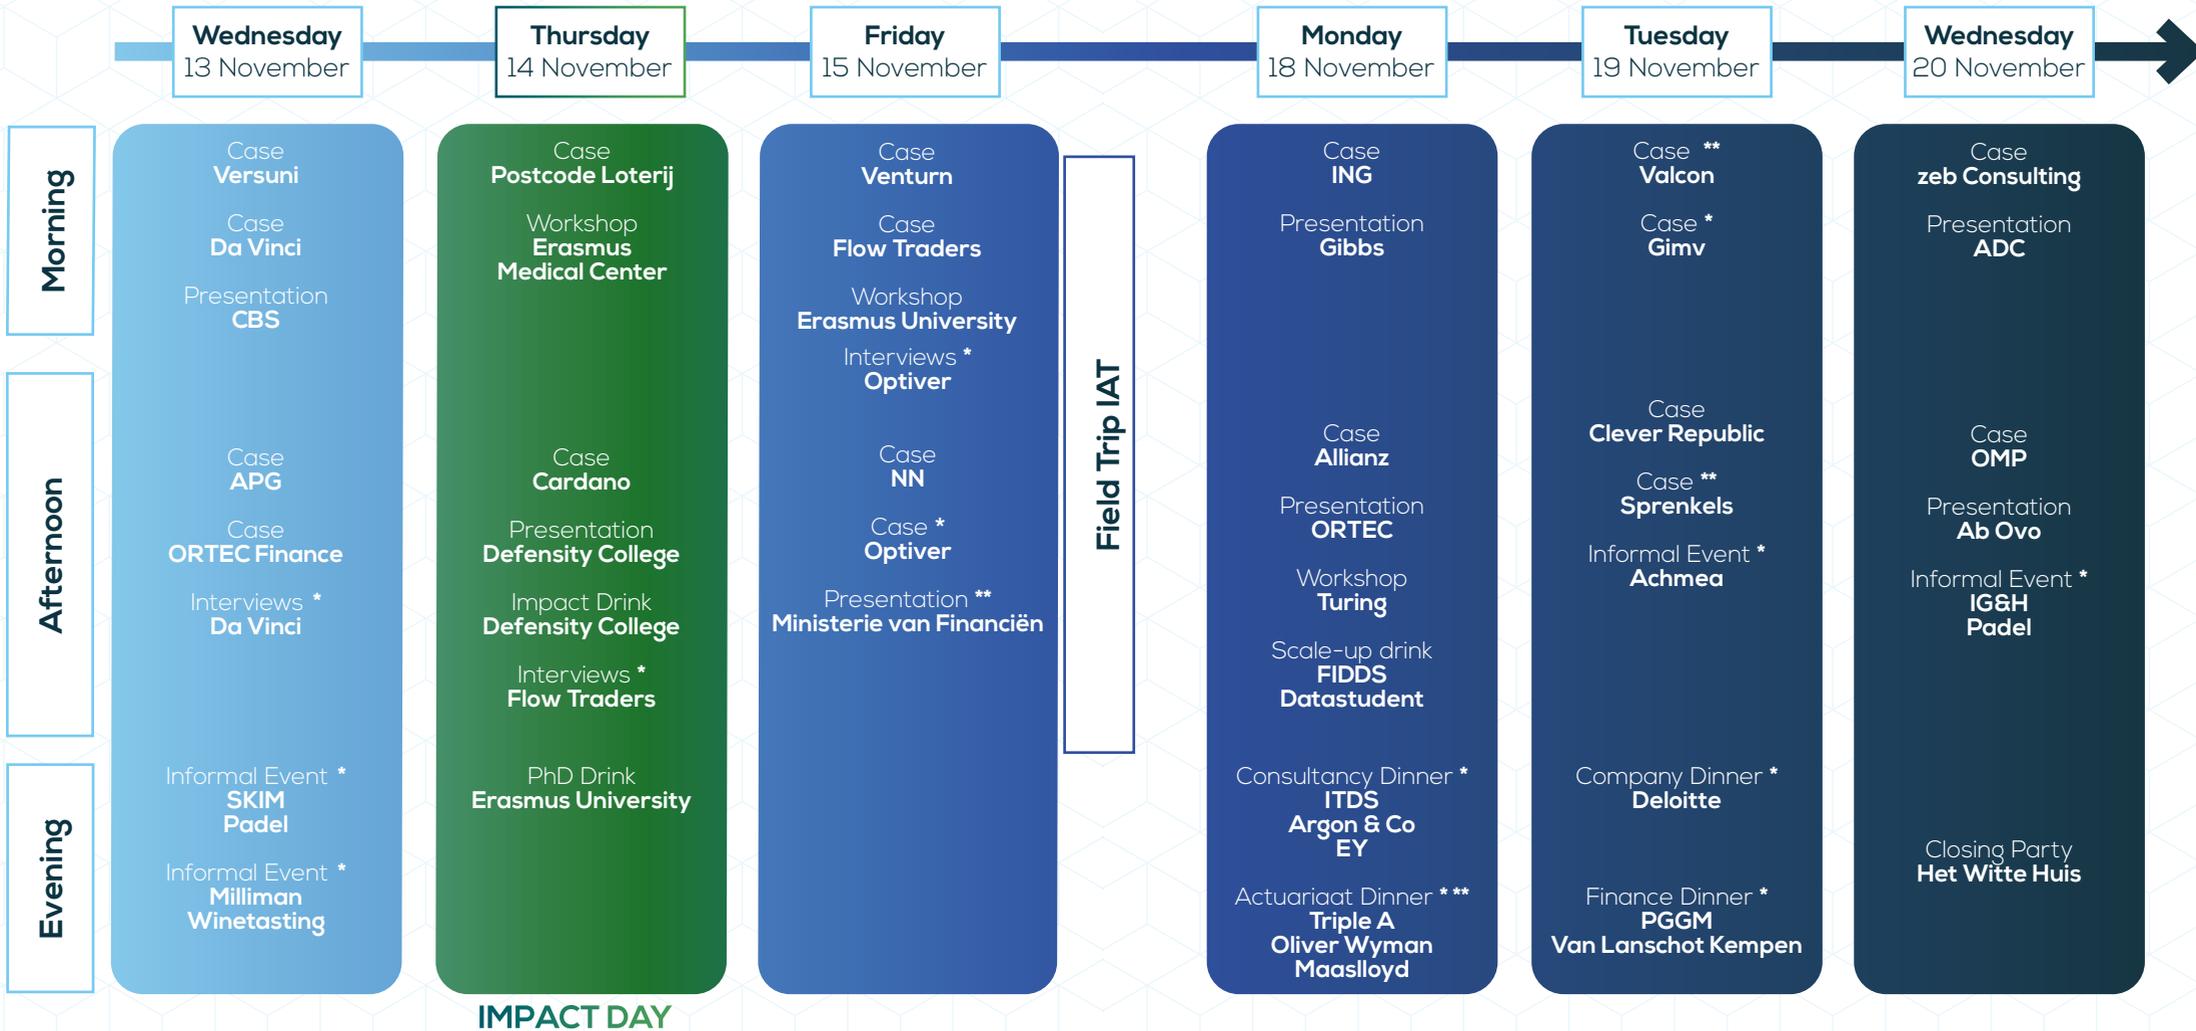

On behalf of the Econometric Career Days Committee,

Wenske Tuk

Cases

A case study is an excellent way to dive into a company's work field and culture. By working on a real-world problem, you will gain valuable insights into their business while applying your analytical skills to solve a challenge. Afterwards, a lunch or drink will be provided, depending on whether the case takes place in the morning or afternoon, respectively. This will provide you with a relaxed setting to connect with employees and ask any questions you might have.

Presentations

During their presentation at the ECD, companies will share insights into their daily operations and highlight exciting projects they've worked on or are currently involved in. They will also provide an overview of career opportunities, giving you a clear picture of what it is like to be part of their team and how you can contribute to their work.

Company Dinner and Branch Dinner

This year, we are hosting one Company Dinner and three Branch Dinners, each starting with a brief presentation to introduce the companies. During dinner, you will have the chance to connect with various employees in a relaxed setting, allowing you to ask questions and get to know your potential future colleagues.

The Branch Dinners include a Finance Dinner with Van Lanschot Kempen and PGGM, a Consultancy Dinner with ITDS, Argon & Co, and EY, and an Actuarial Dinner with Triple A, Oliver Wyman, and Maas Lloyd. The Company Dinner will be hosted by Deloitte. These are great opportunities to engage with professionals in your field and explore career opportunities.

Informal Activities

This year, we are excited to offer a range of fun, informal events designed to help you connect with companies in a relaxed setting. It is all about discovering if there is a good fit between their company culture and yourselves. Whether it is enjoying a wine tasting with Milliman, playing a game of jeu de boules with Achmea or playing a match of padel with SKIM or IG&H, you will have plenty of opportunities to engage with professionals in a laid-back environment. These are unique ways to network, have fun, and get to know companies beyond the typical interview setting, making it easier to see if their atmosphere aligns with yours.

Impact Day

After last year's successful Impact Day, we are excited to be back with even more opportunities to show how you can make a difference with your professional career. This time, we have a variety of engaging activities lined up, including interactive cases, inspiring presentations, a hands-on workshop, and a lively Scale-up Drink where you can connect with companies dedicated to creating positive change.

You will have the chance to dive into real-world challenges with Cardano and the Nationale Postcode Loterij, two organizations committed to making a positive impact. Then, get inspired by the Defensity College as they share their insights on contributing to a better future. Later, join them for a casual chat at the Impact Drink. If you are looking for a more hands-on experience, do not miss the dynamic workshop hosted by Erasmus Medical Center, during which you will explore innovative solutions in healthcare.

After a day full of inspiration and learning, we will come together at the Impact Drink to unwind and network with like-minded professionals and potential employers who share the same passion for making a difference. Join us and discover how you can use your skills to create real change in the world!

Scale-Up Drink

The Scale-Up Drink features two exciting companies, FIDDS and Data student, offering you a chance to dive into the world of fast-growing businesses and discover what it's like to work in a dynamic scale-up environment. You will learn first-hand about their missions and how you can be part of creating a positive impact. It is a unique opportunity to steer your career in a meaningful direction while connecting with inspiring professionals.

PhD Drink

This year's ECD brings an exciting new event: the PhD Drink at Brewpub Reijngoud. It is a unique opportunity to explore the academic world of econometrics and gain insights into a career in research. Professors and PhD students will share their personal journeys, discussing their motivations, research projects, and the impact their work has on the field. After these short presentations, you will have the chance to dive deeper into their experiences and ask all your questions over drinks. It is the perfect setting to discover how academia shapes the world of econometrics and see if a research path might be right for you.

Building on the great success of the first edition of the ECD Talks, this year's edition will take a close look at the hidden side of our democracy. We will explore the data-driven strategies that shape political decisions behind the scenes, discussing topics like data manipulation, disinformation, and the ethical dilemmas at the crossroads of privacy and political power.

In an age where data is power, understanding its role in politics has never been more important. Behind the visible side of elections lies a world where algorithms, data analysis, and targeted strategies influence outcomes in ways most voters are unaware of. The trade-off between data accuracy and privacy raises ethical questions, while the manipulation of such data and information can quietly shape the future of our democracy.

We are excited to be joined by experts at the intersection of econometrics and politics. With their knowledge and experience, they will provide valuable insights into how data shapes political strategies, election outcomes, and public policy. Eager to share their thoughts, these experts offer a unique opportunity for in-depth discussions on these highly relevant topics.

Throughout the panel discussion, you will have opportunities to actively engage in the conversation - whether by asking questions or sharing your own thoughts. All remaining questions can be asked during the Q&A at the end of the discussion.

The ECD Talks will conclude with a **drink at Erasmus Paviljoen**, open to all attendees. There will be a **LinkedIn photographer** to take a formal LinkedIn picture and there will be free drinks to celebrate the start of the 12th edition of the ECD. The language of the ECD Talks will be English and the event is **open to students** of all studies and study phases. Subscribe at ecdrotterdam.nl to join the ECD Talks!

Every year, the ECD offers an exciting opportunity to witness econometrics in action through our Field Trip, where we explore how this powerful tool is used in unexpected fields. It is a chance to gain first-hand experience and see the impact of econometrics beyond traditional industries. Past attendees have found this event incredibly inspiring, so do not miss out!

This year, we are visiting the Information Analysis Team (IAT), a unique collaboration established in 2018 by the Netherlands Police Force Command Team and the Minister of Justice and Security. The IAT brings together experts from the police, the ministry, and the Netherlands Statistical Bureau (CBS) to form a hybrid team focus on conducting in-depth quantitative analyses on social, safety, and policing issues. They also continuously monitor these areas to track developments over time. Their work provides crucial insights that shape strategic management decisions for the police force and serve as key inputs for discussions between the Commissioner and the Minister.

This field trip is a rare opportunity to see how econometrics can influence public policy and contribute to enhancing societal safety. Join us to explore the intersection of data, policy, and security and discover how your skills could make a real-world impact.

MAIN PARTNERS

Our Story

Da Vinci was founded in 2015 after a group of passionate trading experts found themselves desiring a new way of working.

At Da Vinci, our goal is to build the best proprietary trading house in the world. We strive to keep our work smart and creative, making the most of our team's strategic minds to challenge existing ways of thinking. We've established a unique approach to trading and culture, emphasising openness and collaboration across departments.

We specialise in solving market inefficiencies, identifying opportunities based on volatility arbitrage strategies and providing liquidity to the markets.

We are headquartered in the home of the world's first stock market, Amsterdam, and have just opened a second office in Mumbai. Today, we trade on the most prominent exchanges across South America, Asia and the US. Our vision is set on sustainable growth, with new offices opening abroad soon.

Our Vision

Becoming the best in the world means building a team of first-rate talent with the most innovative ideas. The real value comes from how we work and grow together and you can find traders, developers and researchers working side by side every day and enjoying every minute of it.

We are non-hierarchical and support employees as they explore different paths to find where their passion and talent aligns. No matter their role, everyone is key to sustainably growing Da Vinci.

We value innovation and excellence in everything we do, encouraging employees to take ownership of their work. We believe that our colleagues must consistently feel stimulated and supported in order to reach their full potential and achieve our ambitious goals.

Have you always been curious about a career in trading? Da Vinci is giving you a unique opportunity to join our interactive workshop at ECD and find out more about our dynamic and fast-paced world! In this event we wish to let you experience what trading is all about. We feel there is nothing more fun than trading and we want to share our enthusiasm with you. We will introduce you to our organization and give you a glimpse of the ins and outs of trading through games and case studies. This is a unique learning experience and – more importantly – a lot of fun! After the workshop, there will be plenty of opportunity to ask questions to our colleagues from the trading, research and HR. If you love challenges, have a passion for the financial markets and like working with smart and motivated people, do not miss this opportunity!

CHALLENGE

ACHIEVE

Flow Traders, a leading proprietary trading firm in Amsterdam, is seeking Graduate Traders to join their dynamic Trading team. This exciting opportunity calls for candidates who possess competitiveness, drive, and a deep passion for the financial markets. Flow Traders fosters an entrepreneurial and innovative culture, making it an exceptional environment for those who possess quick-witted, creative minds, and believe in leveraging their full potential to achieve remarkable results. If you are an ambitious individual aiming high, this is the chance to see no limits to your growth!

Training and Development

As a Graduate Trader at Flow Traders, you will embark on a comprehensive 4-month training program at their Amsterdam office. This intensive program will equip you with in-depth knowledge of Flow Traders' core business, the financial products they trade, and the intricacies of their trading processes, including pricing strategies and proprietary trading systems. Additionally, you will participate in trading simulations and attend quantitative classes hosted by experienced Senior Traders and Quantitative Researchers, further strengthening your understanding of the crucial role traders play in the financial ecosystem. The training program culminates in a team project, where you will collaborate with fellow graduate traders, showcasing the skills and expertise you have acquired. Following successful completion, you will be assigned to an established trading desk that aligns with your skills and interests. Gradually, you will assume more responsibilities, closely monitor markets, and confidently make split-second decisions that significantly contribute to the overall profitability of your desk.

What you need to succeed?

To succeed as a Graduate Trader at Flow Traders, certain qualifications and attributes are essential. A university degree, preferably in (quantitative) Finance, Science, Technology, Engineering, Mathematics, Statistics,

Econometrics, or a related field, is required. Demonstrable interest in trading and global financial markets is vital, as is a solid understanding of financial products. Proficiency in Excel, a keen interest in IT systems, and an affinity for development languages will prove advantageous in navigating the trading landscape. Additionally, you should exhibit the ability to perform under pressure, possess excellent mental arithmetic and analytical skills, and demonstrate the assertiveness to capitalize on emerging opportunities. An entrepreneurial mindset, coupled with an affinity for creative problem-solving, will thrive in the stimulating work environment at Flow Traders. Strong communication skills and a collaborative approach to teamwork are also highly valued.

Flow Traders accepts applications year-round, and potential candidates are strongly encouraged to attend their e-house days, which provide valuable insights to prepare for the application process. To learn more about these events and other relevant information, please refer to the events page on the Flow Traders website. Joining Flow Traders as a Graduate Trader presents an unparalleled chance to grow and excel in the dynamic world of proprietary trading, surrounded by an innovative and supportive team, while working in one of the financial capitals of the world—Amsterdam. The journey from Graduate Trader to a seasoned professional is filled with exciting challenges and rewards, making this opportunity an extraordinary stepping stone in your career. If you are ready to embrace the limitless possibilities of the financial markets and are eager to make a significant impact, Flow Traders welcomes you to be a part of their thriving team!

Flow Traders is an international leading principal trading firm.

Do you thrive in an environment where your growth and knowledge are constantly propelled to new heights? If so, you should get to know Optiver, a leading global market maker on the cutting-edge of technology, trading and research. Here's what we're all about:

The endless pursuit of excellence:

Ready to accelerate your growth in one of the most dynamic and fascinating industries there is? Discover Optiver, a leading global trading firm powered by technical innovation. For 35+ years, Optiver has been improving financial markets around the world, making them more transparent and efficient for all participants. With our focus on cutting-edge engineering, data science and research, we actively trade on 70+ exchanges, where we're trusted to always provide accurate buy and sell pricing – no matter the market conditions.

Pushing the envelope one idea at a time:

Every day at Optiver is an opportunity to solve these seemingly impossible. It's a place where you're empowered to build, code, develop and strategise ideas that push the boundaries of technological and analytical possibility. Every team member has an integral role to play in this endeavour. From traders to developers, engineers, researchers and business operations specialists, we all strive to find our own unique solutions. It's a melting pot of dynamic thought, fast execution and entrepreneurial spirit.

Your growth is our growth:

Our ethos is based on a hunger for growth that touches everything we do. Accelerated growth not only applies to our global expansion, but also to every individual team member. Our people continually strive to improve and evolve into the best versions of themselves. Optiver fosters this constant growth

by creating an environment where all are considered equal and afforded the same opportunities to flourish. This flat, growth-minded structure rings true across all of our global operations, which span offices in Amsterdam, London, Chicago, Austin, Sydney, Shanghai, Singapore and beyond.

The brightest of the bright:

When it comes to joining Optiver, the bar is set high – and for good reason. To remain at the forefront of market making, we need the best and brightest industry talent within our teams. Fortunately, we value potential over expertise, which is why we hire candidates from a diversity of backgrounds, studies and experience levels. No matter which walk of life they're from, when we find someone with the entrepreneurial spirit we seek, we take it upon ourselves to heavily invest into upskilling them with our world-class training programme. Your next big growth opportunity could be in one of the following roles at Optiver:

- Trading Analyst (Part-time academic job)
- Graduate Trader
- Graduate Quantitative Researcher/Data Scientist
- Graduate Equity Analyst

PREMIUM PARTNERS

Let's introduce ourselves.

Allianz has been the number 1 insurer worldwide for years (over 150.000 employees worldwide). Something we are proud of! In the Benelux, Allianz is one of the major players in the insurance market. We have more than a thousand colleagues in the Netherlands and that number doubles with our colleagues from Belgium. Being part of Allianz offers great possibilities to contribute to the strategy of the company, balancing the risks and the performance, being frequently exposed to senior executives incl. CEO, CFO, etc. and participate in major projects. There are also great opportunities to dive into quantitative analysis of solvency and all the risks present.

We DARE to challenge you to join Allianz Benelux and bring it to the next level!

During the Econometric Career Days we will give a presentation of the risks for an insurance company in a highly volatile interest rate and inflation environment. In the business case you will learn to value various financial products in the current volatile market and find solutions to hedge these risks.

About ORTEC

We are ORTEC, a purpose-driven organization changing businesses and society at large through the power of data-driven mathematical optimization. We make businesses more efficient, more predictable and more effective. Turning complex challenges into easy-to-use solutions.

ORTEC's products and services result in optimized fleet routing and dispatch, vehicle and pallet loading, workforce scheduling, delivery forecasting, logistics network planning and warehouse control. ORTEC offers stand-alone, custom-made and SAP® certified and embedded solutions, supported by strategic partnerships.

We serve clients in almost every industry. And with 17 offices strategically located across 4 continents, we can deliver solutions on a global scale. Always underpinned by local know-how and service.

Working at ORTEC

ORTEC is an ambitious organization. Since our founding in 1981, we have grown to employ over 1100 people at locations in Europe, the United States, Australia and Brazil. Most of our employees began working with us after completing their studies. The average ORTEC employee has a technical master's or bachelor's degree, a strongly developed capacity for analytical thinking and the drive to understand problems and then to solve them.

The company's organizational structure is flat, with short lines of communication. The atmosphere is open and informal, which forms an excellent basis for a productive working environment. You are invited to attend social activities organized by our employees' association, and the Friday afternoon drinks in our own ORTap. Furthermore, an excursion for your department or ORTEC as a whole is organized annually, such as the Christmas breakfast or a barbecue at one of the founders' homes. And in addition to the (Young) Professionals Development Program, each month Young ORTEC organizes activities to help develop your talent, increase your knowledge and expand your network.

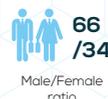

Students and starters

We are always looking for ambitious students/starters who have affinity with IT, optimization and logistics. As a student you can do a graduation internship at ORTEC and as a graduate we have traineeship positions available or other junior positions. Please have a look at our career page for the current vacancies: <https://ortec.com/en/careers/find-jobs/jobs>.

If you are interested in working at ORTEC, you can send your resume, motivation and grades list to recruitment@ortec.com.

Find your challenge

We are OMP, a leading game changer in **supply chain planning solutions**. The world's largest companies count on our **smart software and services** to optimize their supply chains.

Do you hold a master's degree or PhD in engineering, informatics, mathematics, business engineering, production, or operations management? Together we'll **find or create the job you're dreaming of**.

Supply Chain Consultant

You equip customers with innovative supply chain solutions, analyze the planning challenges, assist in the solution design, implement and validate the solution, and ensure a smooth go-live.

User Engagement Consultant

You help our users get the best value from their solution. You provide documentation and training to build planning skills, boost confidence, and improve supply chain planning efficiency.

DISCOVER MORE ABOUT LIFE & WORK AT OMP

We are... a global insights agency!

SKIM is a global insights agency helping leading companies thrive by understanding decision making. What does a big multinational like Coca Cola want to know? Why you buy Pepsi, and not Coca Cola! This is exactly what SKIM looks at: finding out what makes consumers tick, why they buy certain products, are willing to pay a specific price for a brand, and what sentiment the packaging of a product gives to a consumer. By combining different sources of data from our own custom research, we try to answer these kinds of questions. Why is this so important for any multinational? Because small changes in a price, the way a product looks, or even where you put it on a shelf, has a huge impact on the success of that product.

Innovative

It has been at SKIM's heart that even whilst carrying out state-of-the-art research, SKIMmers still have new ideas and thoughts that will help our clients even better. The one thing we have learned from the past 43 years, is that when bright people have a good idea, giving them the freedom to pursue it is always worth it. We basically facilitate the innovation that is at the heart of SKIM by giving you the freedom to pursue the ideas that you believe can solve the toughest problems. What we are saying: we want to hear what your ideas are, because those ideas will deliver the quality we strive for.

People-oriented

We want SKIMmers to feel engaged in their job and to feel they have a platform to grow and discover what they would like to do. That's why we like to base your route, together with you, on your interests and strengths! From the past, we have seen that focusing on these matters really unlocks people's true potential and fulfillment in a job. Besides, you are only just starting your career, right?

International

Our environment is international: our Rotterdam office alone, which is also the headquarters of SKIM, employs SKIMmers from over 30 nationalities. You would not only be working with the Rotterdam team. At SKIM, it is very well possible that you work with colleagues from Berlin, London, Singapore or even the SKIMmers in Latin America or the US. This could be either for client projects, or internal initiatives like helping organize a global Hackathon within SKIM.

Sounds like something for you?

If all of that sounds appealing to you: great! We would love to meet you. There are a lot of opportunities at SKIM to kickstart your career in Consumer Insights, and we encourage you to find your mojo within that. Whether you would like to do an internship or talk about a full-time position, we would be more than happy to have a chat with you. Feel free to reach out to us and enjoy the Econometric Career Days!

We Are Versuni

We are a home to some of the world's most renowned domestic appliance brands – Philips, Saeco, Gaggia, Preethi, Philips Walita, L'OR Barista and Senseo.

With over 130 years of innovation under our belt and with more than 900 patents on our name, our portfolio spans kitchen appliances, coffee, climate, garment, and floor care. We have successfully developed the well-known Airfryer, Espresso Machine with LatteGo, AquaTrio Cordless Vacuum, the Perfect Care Steam Generator, Air Purifier and Speed Pro Max vacuum cleaner.

Versuni is headquartered in Amsterdam, the Netherlands, and we have innovation, manufacturing, and commercial centers across the globe, with a footprint in over 100 countries. We employ approximately 6,400 talented individuals who bring innovation to customers and consumers.

Our mission is to turn houses into homes, and homes into worlds people love. Every. Single. Day.

It is this mission that has been the inspiration for our company name, Versuni, a name based on two words that reflect the meaning of home to many people. Versuni puts a new spin on the powerful word – UNIVERSE. We believe that home is more than four walls and a roof. It's about having a place that you can truly call your own. Versuni also speaks to the word UNIVERSAL. Because no matter where you live, we all have a need for a comfortable space where our heart belongs.

At the core of Versuni's values lies an unwavering dedication to customer satisfaction. Our products are not only designed to meet customer's needs but are also built responsibly and sustainably, with both the well-being of each home and our planet in mind.

What does it take to innovate, again and again? The short answer is people. Passionate, talented people. Versuni is an inclusive, collaborative, and fun place to work.

Every day our extraordinary colleagues come together to discover, design, and deliver solutions that improve people's lives at home. It's an amazing space for students to join our internship opportunities and to embark on a journey of learning, growth, and innovation. Our internship opportunities cover various fields, including:

- Marketing
- Sales
- Finance
- Supply Chain
- Research & Development
- Design
- Procurement
- Human Resources
- And other functions

We invite you to join our journey and become a part of our mission to turn houses into homes!

Make an impact at Achmea!

At Achmea you are not merely a Data Engineer, Digital Marketing professional, IT specialist, or Financial expert. First and foremost, you are someone who works on solutions for societal issues. You are a pioneer in your field, using your talent to create a sustainable and inclusive society in which we enjoy living together and no one feels left out. We call this Sustainable living, together.

Together, we solve major social issues

Since 1811, we have been there for people during the moments that truly matter: during a house fire, a car accident, or a cybercrime attack. Together, we ensure that life goes on. However, we also recognize significant societal issues in the areas of health, living & working, mobility and income. As a major financial service provider with over 10 million customers, we believe we have a role to play in resolving these issues. So, we step up, together with our customers, partners, and 13.000 colleagues.

Lead the way!

In practice, this means collaborating with the finest experts to refine risk models, contributing to healthcare innovations, developing services that make homes more

sustainable, creating apps that promote distraction-free cycling and driving, and developing marketing campaigns that resonate with millions. At Achmea you can make a substantial impact. environment where we inspire one another, embrace innovation, continue learning, and experiment. All of this takes place in an ambitious environment where we inspire one another, embrace innovation, continue learning, and experiment.

Join us in making impact

Do you want to contribute to solutions for societal issues, using your talents? Explore our job vacancies and apply.

ADC is a Data & AI Consultancy driving the responsible adoption of data and AI to create real impact for organisations that matter. We support our clients achieve their goals through data-driven solutions with deep industry expertise. What makes ADC unique is that we work impact driven and collaboratively complementing our integrated offering. Our top talent is driven to leverage their advanced data and AI knowledge and experience for the good, working with, instead of for, our clients. We draw on our collective approach to empower pragmatic and comprehensive consultants, through inclusivity, trust, and ownership.

Our collective culture brings together domain and industry expertise, merging strategy and execution with a comprehensive and pragmatic approach. Our focus extends beyond data fixation; we integrate people, processes, and technology to empower organisations with the tools they need to thrive in a rapidly evolving world. One of the key pillars of our approach is inclusivity. We believe that diverse perspectives drive innovation and unlock new possibilities. By fostering an environment where everyone's voice is heard and valued, we nurture a culture of continuous learning and growth.

What sets ADC apart is our impact-driven ethos. We do not simply work for our clients; we collaborate with them to achieve shared goals. Our team of top talents is driven by a genuine desire to make a positive difference in the world.

Through ethical and responsible data and AI applications, we address pressing challenges, deliver tangible outcomes, and create positive change in organisations.

With deep expertise in various industries, including Financial Services, Public & Society, Healthcare & Life Sciences, and Agriculture & Food, we possess a keen understanding of the unique challenges and opportunities each sector faces. This insight enables us to develop tailor-made solutions that address specific needs, providing organisations with a competitive advantage and the ability to navigate complexities with confidence.

As we expand our presence across Europe, we remain committed to empowering organisations with the tools they need to thrive in an ever-changing landscape. Our recent expansions into Denmark and Sweden reflect our dedication to making a lasting global impact and shaping a better, data-driven future.

If you are passionate about using data and AI to create positive impact and believe in the power of collaboration and inclusivity, we invite you to join our journey. At ADC, you will have the opportunity to work alongside like-minded professionals who share your vision for a brighter, data-driven world. Together, we can create meaningful change, drive innovation, and shape a more sustainable future.

Working as a Quant within APG

Are you fascinated by the world of asset management? Are you socially engaged, and do you want to take an extra step for responsible investment? Are you determined to develop yourself into a quantitative investment expert?

By starting as a Quant within APG Asset Management you will be given the opportunity to immerse yourself in the world of quantitative modeling in one of the biggest asset managers in Europe. Supervised by experienced field coaches, you will work on real asset management issues focused on sustainable investment for the long term. Because APG manages most of its over 500 billion assets internally, you will be able to see for yourself what goes on in departments such as Portfolio Management, Trading, Model Validation and Asset & Liability Management. APG has all this expertise in house, and that is unique.

For pension provider APG, pensions are about people, life, and living together. Through careful asset management, pension administration, communication, and advice, we work towards a livable future for current and future generations.

In which we share prosperity and well-being fairly and sustainably. Now, in the future, and later. Together with 4000 employees in Amsterdam and Heerlen, APG is committed to around 4.5 million people in the Netherlands.

Internships and traineeships

- Our internships are listed here: Internships | Careers at APG. We have working and graduation internships starting in February and September. The vacancies are posted in May and October.
- Trainees start in October every year, the vacancies for the positions open in February. We offer traineeships for future Quants, Finance and Risk Professionals, and Portfolio Managers.

Argon & Co Utrecht is a young and vibrant strategy consulting club leading in the field of strategy and digital operations. Our appealing clients mainly operate within (online) retail, manufacturing, mobility and private equity. We support them in order to enable their growth, to improve their economics, and to enhance their customer facing performance. In our projects, we combine in-depth expertise with fact-based analytics. Fast and pragmatic. We work side by side with our clients, from inception to implementation. It is during this process that we come up with our best ideas. For us, it's a sustainable result that's important, not a report.

We are ambitious and have an entrepreneurial spirit. It is our aim to grow significantly in the coming years. Therefore, we are constantly looking for new colleagues with whom we can join forces to further build our consultancy firm. We offer you a challenging experience where you get to decide how steep your learning curve is. Right from the start, your opinion matters. We are passionate about our work, but we also believe in a healthy work/life balance so you can continue to develop yourself outside the workplace.

We work with leading clients in (online) retail, manufacturing, mobility, and private equity, helping them drive growth and enhance customer performance. At Argon & Co, you get the chance to make an impact from day one; your opinion matters, and you set the pace for your learning journey. Known for our hands-on approach, we focus on delivering sustainable results—not just reports. Are you entrepreneurial, ambitious, and eager to develop your skills in challenging projects? Join us at the dinner to discover how you can shape the future of consultancy with us!

Statistics Netherlands (CBS) provides society with relevant and independent figures on social issues such as climate, sustainability and poverty. CBS is an organisation that is developing rapidly and offers room for your ideas and your knowledge.

CBS is an open, transparent organisation that delivers relevant and independent data to society on social issues, from the economy and employment to health and the environment. We examine "the facts that matter". Your task and role in the statistical process depends on your position. Through your work as an expert, you feed the public debate, nurture policy development and decision-making and contribute to well-being, welfare and democracy. We use our expertise to build a dynamic organisation that is prepared for the future. At CBS, everyone is welcome. We encourage talented people to be of value in an environment where they can be themselves. After all, diversity brings new insights, knowledge and vision to our organisation. CBS is developing rapidly and offers room for your ideas and your knowledge!

Who we are: Clever Republic

Founded in 2020, Clever Republic is a young and dynamic consultancy, specialising in Data Intelligence, Data Governance, and AI Governance. We help organisations transform data into a strategic asset, enabling smarter decision-making and long-term success. Our team, made up of professionals with backgrounds in law, business, marketing, and economics, is driven by a spirit of innovation, collaboration, and mutual support.

We work with global brands such as Heineken, ASML, Odido, IKEA, Leaseplan, ANWB, and PostNL, offering data-driven solutions that empower companies across industries to stay competitive and achieve their goals. Our comprehensive approach focuses on unlocking the full potential of data while addressing the complex challenges of a data-driven world.

Our Vision and Mission

At Clever Republic, we believe that data is not just a resource but a key driver of innovation and success. Our mission is to help organisations unlock the full potential of their data, enabling them to make faster, smarter, and more sustainable decisions. We are also deeply committed to transparency, accountability, and ethical AI governance, ensuring that our solutions align with the values of both our clients and society.

Our approach is a blend of forward-thinking and practical implementation. We work closely with businesses to develop scalable, sustainable strategies that deliver measurable impact.

By pushing the boundaries of Data Intelligence and AI Governance, we empower organisations to navigate the future with confidence.

Who are we looking for?

As a growing company, Clever Republic is always on the lookout for driven, creative individuals who share our passion for data and technology. Whether you are an economic expert, a tech enthusiast, or a strategic thinker, we offer a unique opportunity to contribute to impactful projects and grow within a fast-paced, innovative environment.

We value collaboration, and our team thrives on open communication and mutual support. We are seeking problem-solvers and critical thinkers who are eager to push boundaries and work together to help businesses utilize the power of data.

Opportunities for Students

At Clever Republic, we believe in the power of fresh perspectives. That is why we actively engage with students and young professionals, offering internships and trainee programmes that provide hands-on experience with real-world projects. As part of our team, you will work with major clients such as Heineken, ASML, and IKEA, contributing to impactful solutions in Data Governance, AI Governance, and ESG reporting. We aim to equip students with the skills, knowledge, and confidence to excel in their careers while making a meaningful impact on the world of business and data.

About Datastudent

Datastudent is a company that bridges the gap between analytically strong students and companies looking for data talent. Since 2019, founded by econometricians from Rotterdam, Datastudent aims to make data accessible and valuable for companies while providing students with opportunities to strengthen their skills and CVs during their studies.

What We Do

Datastudent provides students with real-world experience by placing them in data-related projects within various companies. Our goal is to help students apply their theoretical knowledge in practical settings, enhancing their professional skills and networks, and allowing them to refine their abilities in data analysis and visualization. We offer various types of engagements:

1. Short-term Projects: Students can work on data projects from home or on-site, analyzing datasets or building dashboards.
2. Long-term Projects: We also offer more extensive projects that can span several days a week for multiple months.
3. Job Placements: We assist students in finding their first full-time job in the world of data through our vacancy platform.

Our Mission and Values

At Datastudent, we believe that data drives the future. Our mission is to empower both students and companies to harness the power of data. For businesses, this means accessing motivated, knowledgeable students who can bring fresh perspectives

and technical skills to their data challenges. For students, it's about gaining valuable experience and building a strong professional foundation in data.

Who We Are Looking For

We are seeking ambitious students and recent graduates with a strong background in quantitative fields such as mathematics, econometrics, physics, or computer science. Ideally, candidates should possess skills in SQL, Power BI, R, and Python, along with proficiency in analytical methodologies. Excellent communication skills, enthusiasm, and a willingness to learn are also essential.

What We Offer

Datastudent provides a range of opportunities for personal and professional growth. Students benefit from hands-on project experience, mentorship from seasoned data professionals, and access to a network of like-minded peers and potential employers. Additionally, we offer competitive salaries.

Get Involved

If you are a student eager to jumpstart your career in data, Datastudent is here to help. Contact us to learn more about how we can assist you in landing a meaningful (side) job during your studies.

Choose your impact

You want a job with impact. At an employer where you can make a difference. Deloitte is such an employer. With over 7,000 people in 15 offices across the Netherlands, Deloitte is one of the largest providers of professional services in the areas of accountancy, tax advisory, consultancy, risk management and financial advisory. We can only do this if the best people choose us. Students with a broad view, who work in multidisciplinary teams on challenging assignments and thereby enrich their knowledge and experience. Our aim is that our various activities have as much community impact as possible. Let's connect for impact.

Never stop growing

At Deloitte you will learn every day. Whether it's from the complex work you do or the people you collaborate with. And you will be supported to achieve your ambitions your way, wherever your future lies.

Be the true you

We want you. The true you, with your own strengths, perspective and personality. You will work in an environment where everyone belongs, is supported and heard, and is empowered to make a valuable, personal contribution.

Passion for purpose

Making an impact is more than just what we do: it's why we're here. We're driven to create positive progress for our clients, people and society. This sense of purpose is shared by every one of our people. It makes us proud.

FIDDS is a company that positions itself as a leader in data-driven business solutions, with a clear focus on helping organizations optimize their performance by leveraging data management and advanced technologies. Here's a more detailed breakdown of their services and offerings:

Business Intelligence & Data Science Solutions:

Business Intelligence (BI): FIDDS helps companies make data-driven decisions by implementing BI tools and frameworks. They enable organizations to gather, analyze, and visualize data in ways that facilitate strategic decision-making, improve forecasting, and identify trends.
Data Science: Their data science offerings encompass predictive analytics, machine learning, and AI solutions to unlock insights hidden within data. This allows businesses to make proactive decisions, predict market behavior, and optimize operational performance.

Automation:

FIDDS specializes in process automation, helping businesses streamline routine tasks, improve operational efficiency, and reduce human error. Through robotic process automation (RPA) and AI-driven workflows, companies can free up resources for more critical tasks, enabling them to scale more efficiently. Compliance Support (GDPR & ESG):

GDPR (General Data Protection Regulation): FIDDS ensures that businesses are compliant with data privacy regulations. This includes data governance strategies, secure handling of personal data, and ensuring companies follow GDPR guidelines to avoid legal repercussions.
ESG (Environmental, Social, and Governance): With increasing pressure on businesses to adopt sustainable practices, FIDDS provides services to help organizations meet ESG standards. This could involve data reporting and monitoring tools that track environmental impact, social responsibility, and governance practices.
Enhancing Customer Experience & Innovation:

By using AI and data analytics, FIDDS supports companies in creating better customer experiences. This includes personalized customer interactions, predictive modeling for customer behavior

Scale-up Drink

- To be announced!

Gibbs is a data analytics consultancy based in Rotterdam. We help ambitious organizations advance both strategically and practically with a straightforward, no-nonsense analytic approach. Our work centers on making business processes and decisions data-driven, ensuring that customer and operational insights are fully utilized. Many of our projects focus on optimizing marketing strategies, forecasting, and identifying cost-saving opportunities. We work across a variety of industries, serving clients like KPN, Blijdorp, Olympia, and the CBR. Our small teams typically work on projects that last several months, and we prioritize working closely with clients on-site whenever possible. This ensures that every project is customized to meet each client's specific needs – no two projects are ever the same.

Opportunities

Working at Gibbs comes with some great perks, including an office view of the Coolsingel, the support of a close-knit team that prioritizes maintaining a healthy work-life balance, many social events, and knowledge-sharing sessions. Each year, we offer a number of consultancy internships, and we typically hire around two new junior consultants. We provide consultancy internship for students completing their master's in econometrics, particularly in tracks such as Business Analytics & Quantitative Marketing.

Analytics and Operations Research in Logistics, and Econometrics. During the internship, you will work on a real project for one of our clients, splitting your time between Gibbs' office and the client's location. This offers a valuable opportunity to gain hands-on experience in analytics consulting. With guidance from one of our senior consultants, you'll manage a complete consulting project within six months – from the initial client meeting to the final presentation.

As a junior analytics consultant at Gibbs, you will work in teams on assignments for a variety of organizations, both on-site with clients and at Gibbs' office. In your first two years, you will follow our internal training program, which includes a mix of technical and soft skills development. You'll participate in modules covering SQL, PowerBI, presentation skills, and consulting techniques, among others. We are looking for students who are passionate about data and skilled in building quantitative models. You should enjoy the challenge of translating insights into actionable recommendations for clients and have strong communication skills to effectively present your findings. Since most of our clients are Dutch, fluency in Dutch is required. If you don't get a chance to meet us during the Econometric Career Days, feel free to reach out – we would love to hear from you!

About IG&H

IG&H a leading consulting firm that takes responsibility for the results of its work. With focus on digital transformations, we use our own proven 'Make Strategy Work' methodology for successful execution.

What can we do for you?

We typically help with complex questions and innovation matters. Our sector-specific software solutions help you achieve results faster. Together with our clients, we co-create a sustainable impact on society. This means we only accept projects that positively affect the lives of people. Our proven "Make focus on content, process and people.

What can you expect from collaboration with IG&H?

Standing shoulder to shoulder, we are an extension of your team. IG&H brings an entrepreneurial and pragmatic mindset to the table. We combine multi-disciplinary teams, so you get the best out of strategy consulting, data and technology capabilities.

Our proven "Make Strategy Work" methodology enables us to turn strategies into actionable programs that deliver value fast. Together with you, we focus on content, process and people.

- Content – it's right. A structured, logical and fact-based result.
- Process – it works. A controlled, predictable and smooth process.
- People – it lands. Attention to energy and support by all stakeholders.

IG&H will make your strategy work. We are excited and equipped to help you innovate

International, innovative, sustainable and... orange!

That's right, we're talking about ING. The leading Dutch bank for digital banking. You'll know us through our mobile banking app that lets you carry out all your bank transactions yourself. We help our customers to stay one step ahead, in both their private and professional lives. The same goes for our own people, of course. Their wellbeing is our top priority. We make sure everyone can feel good about themselves and maintain a good work-life balance.

As a global organization (operating in more than 40 countries!), ING offers a wide range of career paths and development opportunities. We offer a dynamic work environment where you can apply your econometric skills and knowledge. Curious to learn more about our culture?

Find out what our colleagues say: <https://www.ing.jobs/netherlands/why-ing/culture.htm>

Working at ING

Every year, more than 350 students, join ING for an internship, either to work along or write their thesis. Most internships are for 36 hours a week in Amsterdam. Graduated and not sure what you want to do yet? Join our two year traineeship: The International Talent Programme (ITP). You will get to explore multiple departments through 3 rotations of which you can even do one abroad. Afterwards, you start in your permanent role. There are 9 tracks you can apply for: Analytics, Tech, Risk, Operations & Change, Wholesale Banking, Business Banking, Retail Banking, Finance and HR. Most econometric alumni end up either in the Analytics or Risk track of the ITP.

You can find more information about internships the ITP and starter positions on our career website. Go to ing.nl/careers.

We are ITDS Business Consultants

ITDS is a consultancy for financial service providers and we serve renowned Dutch insurers, banks and pension funds since 1998. We combine the experience we have accumulated with our in-depth knowledge of technology, legislation and digital marketing. Because that is where you will find the cutting-edge solutions that will make all the difference.

If ever there was an exciting time to work in financial services, that time is now. Change is the norm and tension the lowest common denominator. It is a given that everything is about to be shaken up. That is what makes the future so irresistible. We believe in the power and value of financial service providers. And we see a surfeit of opportunities for them too. It is why we like to act as the link between our clients and their potential.

We dare to look beyond

Insurance policies, banking products and pensions are a necessary good; we cannot do without, neither today nor tomorrow. But the industry is facing substantial challenges: it needs to become more digital, more social and more customer centric.

But where to start? And how to continue? Our 175 employees are ready and waiting to think, work and do business. Together we can keep the financial sector strong.

We are looking for people who do things differently

At ITDS you will be working on projects that will really help major brands in the financial services sector. Projects that have never been carried out before - or not the way that we carry them out anyway. We are right on top of the latest developments and technology, which we deploy to make our solutions even smarter and faster. So take as much space as you need, because your ideas will take ITDS even further.

Meet us at the ECD

Consultancy Dinner

- Monday 18th November
- Evening: 18.00-21.00

Maasloyd is one of the Netherlands' youngest (non-life) insurance companies. We started doing business in 2019 and we are expanding our business together with a small but growing and diverse group of colleagues. In doing so, Maasloyd is committed to entirely using our in-house developed IT organisation to enable innovation and efficiency.

We are a capacity provider for Dutch insurance agents, and we are currently developing new insurance products. We do this by using a fresh set of eyes and looking at our cooperation with Dutch insurance agents from a technological perspective. This form of business makes Maasloyd different from other common and known insurance companies and therefore more interesting!

Within our team, we currently have an opening for the position of actuary that seconds as data analyst. The daily tasks of an actuary at Maasloyd include the construction of financial and regulatory reporting from start to end, solving ad-hoc questions with high financial impact, providing your analysis on many new business cases and the optimisation and calculation of business parameters with respect to the impact on own funds, Solvability and EIOPA framework. A function at Maasloyd is always broader than we can put into words, it is all hands-on.

Thanks to the small size of our organisation, the actuary coöperates with the Managers and CFO daily. We are looking for real team players who like to propose and develop new ideas and initiatives.

Our office is located in Rotterdam near Erasmus University! A perfect location to combine your studies with a job at our company. We know how important your studies are and are very flexible in work hours and days, also in exam weeks.

Dinner

Binnen ons team zijn we op zoek naar een actuaaris. Het verschil met werken bij grote verzekeraars, is dat je als collega bij Maasloyd betrokken bent bij iedere stap in het proces! Als jij jezelf ziet in een functie als actuaaris en parttime sparringpartner/data analyst/Excel goeroe/sfeermaker, dan zijn wij op zoek naar jou! Wij zijn op zoek naar echte teamspelers die graag nieuwe ideeën en initiatieven aandragen.

We zien ernaar uit om je te ontmoeten bij het diner en je een klein beetje de sfeer van ons bedrijf te laten proeven!

At Milliman, you work with impact in the field of actuarial and financial risk management. The projects we do are focused on the quantitative aspects that financial institutions are dealing with, from internal models to M&A processes, and from predictive modelling to option pricing. The variety of projects allows you to develop yourself as a consultant and build on the skills and knowledge you have gained at university. At Milliman, you work in an environment with a lot of freedom, and colleagues who are ambitious, resourceful, and willing to help.

Who are we?

Milliman is among the world's largest providers of actuarial and financial risk management related products and services. Founded in 1947, Milliman is an independent firm with offices in major cities around the globe. Apart from the traditional actuarial field, we also support our clients on financial risk management and data analytics.

Who are we looking for?

We are looking for junior hires who are bright, hands-on, quantitatively strong, and have an affinity with the financial industry. You should have excellent problem-solving skills and are able to work both independently and within a team on a wide variety of projects. Effective communication skills are a must to maintain and develop client work relations.

What do we offer?

We offer a dynamic working environment with responsibility from the start! As a starter, you will be able to gain experience in the broad range of practice areas of actuarial and financial risk consulting as well as data science related projects, with clients inside and outside the financial industry. While gaining experience you will be able to develop yourself as consultant in your preferred areas of expertise.

Contact

Contact talent.benelux@milliman.com if you would like to know more about Milliman, and the work we do!

- Wednesday 13th November
 - Evening: 20.00-22.30

Ministerie van Financiën

This event is only accessible for Dutch speaking students

Het werk van het ministerie van Financiën gaat over meer dan alleen geld en cijfers. Het gaat over mensen zoals jij en ik. Mensen met verwachtingen, zorgen, vragen en dromen. We rekenen bijvoorbeeld allemaal op financiering voor goede zorg en goed onderwijs. Op duidelijkheid over belastingtarieven en op betrouwbare banken en verzekeraars. Dat geldt voor Nederland en daarbuiten.

Werk je graag in een omgeving middenin de politieke belangstelling? Wil je de mogelijkheden krijgen om je steeds te ontwikkelen en door te groeien? Dan pas je uitstekend bij het ministerie van Financiën.

De lijnen zijn kort. Dat betekent dat ook starters snel met de politieke en ambtelijke top om de tafel zitten. Investeren in onze medewerkers vinden wij vanzelfsprekend. We willen dat iedereen zich thuis voelt bij het ministerie van Financiën en zichzelf volledig kan ontwikkelen. Want samen werken aan een financieel gezond Nederland is waar we voor staan. Dit doen we vanuit verschillende perspectieven, achtergronden en inzichten, omdat we geloven dat dit onze denkkraft vergroot. Iedereen is welkom ongeacht culturele achtergrond, leeftijd, arbeidsvermogen, gender of seksuele voorkeur. Met jouw unieke bijdrage spelen we beter in op de

behoeften uit onze samenleving.

Ook bijdragen aan een financieel gezond Nederland? Solliciteer op een van onze stages, traineeships of startervacatures via WerkenvoorNederland.nl of neem contact op met onze recruiters.

Wist je dat...

- Je met 15 verschillende traineeships bij het ministerie van Financiën aan de slag kan, waaronder ons Startende Economen programma bij de Generale Thesaurie?
- Je bovenop jouw salaris 16,47% IKB budget uitbetaald krijgt?
- Je ook als stagiair al lid kan worden van onze jongerenorganisatie 'JoFi', die diverse (in)formele activiteiten organiseren, waaronder borrels, tripjes, lezingen en sportactiviteiten?
- Je als ambtenaar bij Financiën een eigen opleidingsbudget krijgt, zodat je altijd kunt door ontwikkelen in een richting die bij je past?

NN Group is an international financial services company, active in 11 countries, with a strong presence in a number of European countries and Japan. With all its employees, the Group provides retirement services, pensions, insurance, banking and investments to approximately 20 million customers. NN Group includes Nationale-Nederlanden, NN, ABN AMRO Insurance, Movir, AZL, BeFrank, OHRA and Woonnu. NN Group is listed on Euronext Amsterdam (NN).

At NN, our purpose is to help people care for what matters most to them. We put our resources, expertise, and networks to use for the well-being of our customers, the advancement of our communities, the preservation of our planet, and for the promotion of a stable, inclusive, and sustainable economy. We are committed to doing business in a way that is consistent with our values: care, clear, commit. These values guide our interactions with all stakeholders, and they embody responsible business conduct and corporate citizenship.

Internships

An ideal way of gaining important practical experience during your education, while discovering a possible career at NN Group.

Starting positions

For graduates in various areas and business units. Discover our quantitative starter positions at www.nn-careers.com.

Traineeship

If you are a talented graduate and looking for a place to develop and challenge yourself, the two-year traineeship programme at NN Group is the perfect start of your career. The programme offers roles in one of the following areas: Finance & Risk, Tech and Business & Transformation with multiple rotations and the possibility to start or finish the traineeship in one of the 11 offices around the world.

We aim to make financial services more personal and relevant for our customers, which is why we need people like you: people who care about others, who are used to taking initiative and responsibility and who don't give up until they succeed. Together we can make a difference. In a working environment where your personality, talent and ideas really matter. Although there is no 'one size fits all' profile for the traineeship, there are some competencies that could help you become a trainee. If your ambition is to become a leader, then the traineeship is perfect for you! Also, we value proactiveness, drive, and willingness to view situations from a different perspective.

The Postcode Lottery Group is an international organisation with a social purpose. We set up and run lotteries to raise funds for a fairer, greener, healthier world. Our players win prizes together with their neighbours and raise money for charity together – it's a win-win! Postcode Lottery players have raised over €13.5 billion for more than a thousand charities since 1989. We're the 3rd largest private charity donor in the world. Every day, our 1,500 team members in the Netherlands, Sweden, Great Britain, Germany and Norway are helping to raise around 2.5 million for charity partners. Our doors are always open for talented people. Our core values are important in our daily business. They drive our decisions, how we act, how we communicate, and ultimately how we are perceived. Using our core values in daily thinking and actions generates creativity and entrepreneurship. And it bonds us across departments and countries.

Courageous

We have the courage to act outside established frameworks. We come up with solutions others haven't yet thought of or tried. We put our weight behind charities and NGOs that show that same courage.

Fun

Obviously the players enjoy the games and win great prizes. We enjoy our jobs as well. Through the social organisations, we can make a meaningful contribution to society by supporting both people and the planet.

Sharing

Players win prizes together with their neighbours and the charities we support win too, by receiving vital funding. As a team, we share our knowledge and skills.

Sustainable

We support the global process towards sustainability. We strive to make sustainable choices wherever we can, through our actions and lottery operations, working with sustainable partners, and making charitable contributions.

Victor Lundell, Data Scientist at the Postcode Lottery Group "The best thing about working at the lottery is the wide area of topics I work with, and the freedom I have throughout the entire process. From identifying new opportunities, to implementing creative solutions and sharing insights with the organization."

We are looking for people who are eager to learn, drive to solve complex challenges and loves using advanced analytics on large amounts of data, ready to make impact and are international oriented.

About Oliver Wyman

Let's introduce ourselves! We as Oliver Wyman are known for our **high-quality work and attractive career opportunities**. Oliver Wyman is a global leader in management consulting, with offices in 75 cities across 30 countries and over 7,000 professionals worldwide. The firm combines deep industry knowledge with specialized expertise in strategy, operations, risk management, actuarial science, and organization transformation.

Oliver Wyman Actuarial

Oliver Wyman's Actuarial Services (OWA) practice is a separate entity within the Oliver Wyman Group. OWA focusses on the Financial Sector and specifically insurance companies. We offer **strategic-focused high-end actuarial advisory** covering all risk topics ranging from classical actuarial regulatory issues, risk management, data science and cutting-edge modelling.

Oliver Wyman Actuarial Consulting Europe is a fast-growing platform and leading pan-European actuarial consultancy of 90+ actuaries. Our Dutch actuarial team, situated in Amsterdam, was established in 2021 and offers the opportunity to learn and grow quickly in a fast-growing collaborative environment. The Dutch actuarial team operates as part of a broader European Actuarial Practice, with offices in the UK, Spain, Germany, France, Switzerland, Italy, and the Netherlands.

In this international space, we foster personal connections and an informal working atmosphere where you can work alongside highly ambitious and energetic professionals, who combine a strategic mindset with professional qualifications.

The Work We Do

As an Actuarial consultant at OWA, you will work in teams to solve high-level business problems for top financial institutions. You will conduct research and analysis, lead complex projects and develop leadership and client management skills.

Our **mission** is to be a leader in the integration of actuarial science, data science, and information technology to solve our clients' most demanding challenges:

- We combine traditional actuarial principles with non-traditional solutions and communicate honestly and objectively.
- We believe that diverse perspectives and approaches are business imperatives, and these can only stem from a diverse group of people.

Interested?

By consistently producing results, we have earned a reputation for quality work and attractive career opportunities.

For our actuarial practice, we are looking for energetic, entrepreneurial professionals who offer initiative, intuition, and creativity with a strong background in problem solving and analytics. Our current open positions include working students and entry-level consultants.

Would you like to know more about our work, clients and European Actuarial consulting practice? We are happy to meet you during the Branch Dinner!

Meet us at the ECD

Actuarial Dinner

- Monday 18th November
- Evening: 18.00-21.00

Do you want to work with smart, helpful and driven colleagues? Do you want a substantive challenge and lots of learning? Then Ortec Finance is your place!

Working at Ortec Finance means working in an organisation where long-term (client) relationships are key. An environment where colleagues are willing to help each other and clients. We offer you an organisational culture in which you can develop and get the best out of yourself. The culture is informal, flat and friendly. But also innovative: how can we together make our customers' work - and our own work - better, more efficient and easier? Good ideas are always welcome. We give you every opportunity to develop your talents and welcome entrepreneurship.

Ortec Finance is the leading provider of technology and solutions for risk and return management. Our goal is to enable people to manage the complexity of investment decisions. We do this by providing leading technologies and investment decision solutions to financial institutions around the world. Municipalities and tax collaborations are also among our clients. Our strength lies in an effective combination of advanced models, innovative technology and in-depth market knowledge.

Our head office is located in Rotterdam. We also have offices in Amsterdam, London, Toronto, Zurich and Melbourne.

- 20+ countries represented
- 500+ customers
- 96% retention rate
- 3 trillion euros in assets under management from our clients

During your studies:

You can gain experience as a student assistant at Ortec Finance during your studies. This is possible from as little as 1 day a week. In addition, you can graduate with us. We also offer you the opportunity to do both at the same time!

After your studies:

Ortec Finance is always looking for smart, driven colleagues with good ideas. Most people work with us as software developers, information analysts, business analysts, quantitative financial analysts and consultants. But please contact us to find out together what suits you best. Where your talents come into their own and where you can develop.

How do I get in touch?

If you are interested in the opportunities Ortec Finance can offer you during or after your studies, please contact us by phone on 010 - 700 -50 00 or by e-mail recruitment@ortec-finance.com. On our vacancies page <https://www.ortecfinance.com/vacancies> you will find all current vacancies and thesis topics. If a vacancy or thesis subject appeals to you, we invite you to apply via the application button. We will contact you as soon as possible.

We hope to meet you soon!

The responsibility for over 250 billion euro and the pension of more than 4.4 million people. Do you want to know what that is like?

Who are we?

PGGM is one of the largest asset managers and pension fund service providers in the world. We provide services in the field of integral asset management, pension management, communications, and executive advice to a range of pension funds, affiliated employers and their employees. Currently, we manage pension assets worth in excess of €250 billion for a range of clients and their 4,4 million participants. Pretty interesting to come and have a look, right?

The desire that we share with our clients is for their participants to enjoy a good pension in a sustainable, liveable world. A pension is more than just money. This is why we want to achieve good returns with our investments and at the same time have an impact on creating a sustainable world. PGGM is not merely a pension fund service provider; we really stand for something. As true professionals in the pension sector, with deep roots in the healthcare sector, and as a cooperative financial institution with no profit motive, we look towards the future with an open and broad vision.

Working at PGGM

Working at PGGM means working at an highly professional and leading company. We offer a professional working environment with many opportunities to develop yourself.

High ambition and a great capacity for innovation are distinctive for PGGM. We are continuously looking for ways to meet the needs of our industry. An exciting challenge to which you can contribute. Teamwork, sharing knowledge and independence are highly valued. PGGM values an open and honest culture with respect for people and environment and offer you work that matters.

What's in it for you?

In the continuous changing pension world and dynamic financial sector we always look for talented students who – together with us – want to make a difference. We therefore offer corporate, investment and quant traineeships, challenging starting positions and interesting internships in both our asset- and pension management units.

For more information, have a look at our career website – www.pggm.nl/werken-bij – to see which job and internship positions we offer. Or contact Meryem el Ajjouri - Campus Recruiter (meryem.el.ajjouri@pggm.nl or 06 - 51064717) to discuss any career opportunities.

Sprenkels

This event is only accessible for Dutch speaking students

Bij Sprenkels zijn wij dagelijks bezig om complexe vraagstukken op het terrein van actuariaat en beleggen terug te brengen tot de kern. We gebruiken onze expertise en ervaring om onze klanten te voorzien van een data-gedreven strategie. Wij werken met state-of-the-art kwantitatieve modellen aan innovatieve oplossingen.

Bij Sprenkels zijn we **vindingrijk en nieuwsgierig**. We zijn altijd op zoek naar uitblinkers die willen werken in een dynamische en uitdagende omgeving. Wij staan open voor de knapste koppen uit kwantitatieve disciplines, op zoek naar een rol met écht impact. Bij ons krijg je direct veel verantwoordelijkheid en werk je op het scherpst van de snede.

Je groeit bij Sprenkels zo snel als je zelf aan kunt. Omdat wij geloven dat je sneller groeit zonder uitgestippeld pad. Als consultant werk je mee binnen ons unieke bedrijfsmodel waarin ondernemerschap voorop staat.

Samen met zo'n 100 ambitieuze collega's werk je rechtstreeks voor onze klanten. Je werkt op ons kantoor in Amsterdam of Rotterdam. Daarnaast krijg je flexibiliteit om hybride te werken. Onze consultants hebben veelal een achtergrond in econometrie, actuariaat of wiskunde.

Nieuwsgierig?

Wij ook! Neem contact op met Marieke Klein: 06 55 530 249 werken@sprenkels.nl

Wie is Triple A - Risk Finance?

Triple A - Risk Finance is een onafhankelijk en innovatief consultancybedrijf gespecialiseerd op het gebied van actuariaat en risicomangement, opgericht in 2006 en gevestigd in Amsterdam. Triple A is een bedrijf met een platte structuur en enthousiaste jonge professionals. Mede door de korte lijnen met het management is er volop ruimte voor eigen inbreng en verantwoordelijkheid. Dit geeft onze medewerkers de kans om buiten de gebaande paden te gaan en de vaak kwantitatief uitdagende opdrachten met een creatieve benadering op te lossen.

Wat doet Triple A - Risk Finance?

We werken vanuit de business lines: Pensions, Insurance, Risk & Strategy Consulting, Banking, Actuarial Technology en Data Analytics. Onze klanten variëren van grote multinationals tot kleine ondernemingen onder te verdelen in banken, verzekeraars, pensioenfondsen, pensioenuitvoerders en werkgevers. We werken vanuit ons eigen kantoor, thuis en op locatie bij de klant.

Voorbeelden van werkzaamheden zijn onder andere:

- Ontwikkeling van actuariële projectiemodellen
- Uitvoering van risicoanalyses
- Prijsstelling van schade- en inkomensverzekeringen
- Advisering over nieuwe pensioenregelingen
- Asset & liability management
- Ontwikkeling van krediet- en marktrisico modellen
- Verslaglegging

Een standaard carrièrepad bestaat dan ook niet binnen Triple A. Je ontwikkelt je als risk professional met je eigen accenten. Kortom, we bieden uitgebreide mogelijkheden tot een zeer uitdagende carrière in de consultancy op het gebied van actuariaat en risicomangement.

Hoe is de werksfeer bij Triple A - Risk Finance?

Triple A - Risk Finance is een jong en dynamisch bedrijf. Dat geldt zowel voor het bedrijf zelf, als voor de mensen die er werken: de gemiddelde leeftijd van de consultants ligt rond de 33 jaar. Het bedrijf is volop in ontwikkeling en bestaat uit een team van zo'n 160 mensen. Het is het gevolg van de unieke dynamiek binnen Triple A: een gevoel van ondernemerschap en vastberadenheid om samen ergens voor te gaan. De dynamiek vind je binnen het hele bedrijf terug in de manier van werken en de sfeer op kantoor. De omgang met collega's is open en informeel, en tegelijkertijd gaan we met z'n allen voor het beste resultaat.

Meer weten?

Wil je meer over Triple A - Risk Finance weten, bezoek dan ook onze website voor meer informatie of neem contact op met Iris Koot - iris.koot@aaa-riskfinance.nl of +31 (0)6 156 316 19

valcon

This event is only accessible for Dutch speaking students

Valcon is a European consulting, technology and data company based in the Netherlands, Denmark, UK, Sweden, Germany, Croatia and Serbia.

Our mission is to combine premium consulting with deep technology and data knowledge to add value to our clients. With our capabilities, we help clients to create value in transformations, from operational strategy to implementation, supported by a wide array of IT tools.

We're pragmatists. How we deliver is as important as what we deliver. We'll help you get the right results in the right way. Having integrity means everything to us. We have respect for each other and our clients and take responsibility for what we do: the promise, the process and the impact. We know that every link matters in improving a company's value chain. We support our clients in pursuing the right change in people, systems, data and processes.

Our involvement is based on deep knowledge and experience, working shoulder to shoulder with many different organisations. We are curious and strive to learn and welcome feedback to deepen our understanding, support growth and uncover new and innovative solutions.

Van Lanschot Kempen is an independent, specialized wealth manager, active in private banking, investment banking and investment management.

Founded in 1737, we are the oldest independent financial institution in the Netherlands. Every day, we work to preserve and build wealth in a sustainable way, both for our clients and for the society we are part of. We have opportunities for different areas of expertise, such as Investment Banking, Investment Management, Private Banking and Digital & Technology.

In common, we are keen to hear from motivated candidates interested in finance. Within Van Lanschot Kempen, we share the following values: personal, decisive, specialized and entrepreneurial. They are a compass for what our brand stands for and how we want to work together.

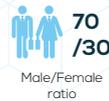

Our purpose is to create sustainable value for all our stakeholders in a way that contributes to sustainable solutions to the most pressing global challenges. We believe that preserving and growing wealth in a sustainable way is a people's job. To help us achieve our goal, we are looking for candidates with excellent analytical skills, as well as a proactive attitude.

We always require our analysts to confront challenges, and interns are no exceptions. Are you independent and resourceful? If you feel that you are a good match, apply to any of our internships: <https://www.workingatvanlanschotkempen.com/internships>.

Finance Dinner

- Tuesday 19th November
- Evening: 18.00-21.00

Venturn

Venturn supports organizations worldwide in successfully implementing change. We deliver four complementary propositions that reinforce each other and are aimed at improving performance and processes in the maritime supply chain. From our head office in Rotterdam, and branch offices in Breda and Denmark, we work globally and deliver our services to internationally active companies. At Venturn, we believe that people are the key to innovation and excellence. Talent development and bringing in innovative perspectives are therefore central to us. This makes Venturn a top choice for young professionals looking to grow and make an impact within the maritime sector.

Venturn Young Professionals (VYP)

One of the four propositions, the Venturn Young Professionals Program is specifically designed for future leaders. This paid 2-year management development program is designed for WO graduates with 0-2 years of work experience, who want to give their career a flying start in the maritime sector. You will work in a challenging environment where you will have many opportunities to develop yourself, continue to learn and discover where your passion lies, in addition you will have responsibility on the work floor from day one. As a VYP'er you step into the dynamic and diverse maritime supply chain, where knowledge and talent come together to solve complex business challenges.

The VYP program is a paid two-year traineeship where you will work on 2-4 exciting projects throughout the program. In the VYP program you will work directly with leading companies in the maritime sector, such as shipping lines, logistics service providers, port authorities, terminals, offshore companies, and various public and private organizations. You will also follow a comprehensive curriculum focused on supporting both your professional and personal growth, with topics such as project management, leadership, and data analytics.

In addition to following many training courses in the area of soft and hard skills, you will also spend sufficient time on guidance during the traineeship. For example, you will receive job coaching from a senior consultant and have at least 3 one-on-one sessions with a professional coach to help you develop into a full-fledged professional. Furthermore, many social activities such as drinks and team outings are organized with both fellow trainees and former trainees.

Since the start of the VYP program in 2007, around 100 young professionals have already set their course for a successful career in the maritime industry. Are you ready to jump into the deep end? The VYP program will develop you into a desired professional, with a promising, managerial maritime career in your sights.

About zeb

Zeb is a leading management consulting firm specializing in financial services, with over 1,200 employees and 800 specialists across 9 European countries. Our expertise spans strategy development, risk management, sales, organization, corporate management, human capital, and IT. Serving most of the top 50 European banks, we are known for our getting-things-done attitude.

Founded in 1992 by two professors from the University of Münster, Germany, we are strongly driven by analytics. We develop visions and strategies, make them calculable, and carry out their implementation, all while remaining focused on results.

Our consulting services are organized into various Practice Groups (PGs), including Risk & Advanced Methodology, Corporate & Institutional Banking, Private Banking, Digitalization & Digital Assets in FS, and Treasury & Asset Liability Management, among others.

Our Amsterdam office is looking for students and graduates with a strong quantitative background to grow our team further. The ideal candidate has an interest in finance, a sense for business, and strong communication skills.

High proficiency in English is a must, while advanced knowledge of Dutch or German is a great plus. Master's (soon-to-be) graduates are welcome to apply for both internship and full-time consultant positions, while Bachelor students with above-average grades are encouraged to apply for internship opportunities. These opportunities are also available at our other international offices.

While zeb is established as one of the largest consultancy firms in financial services, our Dutch office is still in a growing phase, currently with 10 full-time consultants. We offer new joiners the opportunity to learn from zeb's extensive network and be closely involved in the daily activities of a growing office, including client acquisition and topic development for the Dutch market. Additionally, the size of our office allows us to meet regularly for social events.

Our Amsterdam office, characterized by its international environment, mainly covers topics from our PGs Risk & Advanced Methodology and Corporate & Institutional Banking. You would primarily work on risk management topics and projects like improving mortgage pricing or advising on the integration of banks due to M&As, as well as incorporating sustainability and ESG (Environmental, Social, and Governance) factors into banking practices. If you'd like to learn more about the topics we handle in our Risk & Advanced Methodology PG, we'd be delighted to meet you at our company case event during the Econometric Career Days. A recent QF graduate and a (senior) manager will be there to tell you more about zeb.

Wat is Defensity College?

Defensity College is het werkstudentprogramma van Defensie voor HBO- en WO-studenten

Wij bieden jou tijdens je studie een unieke bijbaan en leiden je op tot militair. Je kunt bijvoorbeeld je technische kennis inzetten bij het ontwerpen van een communicatienetwerk of een mobiele grondstation. Helpen bij het schrijven van een scenario waarmee militairen hun interculturele gesprekstechnieken trainen. Duurzame innovaties bedenken om CO₂-uitstoot te verminderen op een marineschip, of als historicus ervoor zorgen dat we leren van het verleden. We hebben zowel studie-specifieke als algemene opdrachten waar analytische denkracht voor nodig is. Elke studie kan een ijzersterke bijdrage leveren aan een veiligere wereld, dus ook die van jou!

Neem je een tussenjaar en wil je liever een jaar lang fulltime (vier à vijf dagen in de week) aan de slag bij Defensie? Ontdek dan je mogelijkheden voor een Dienjaar Defensie.

Leer Defensie én jezelf kennen Als militair werkstudent ben je reservist en werk je op plekken die met jou zijn afgestemd en passen bij jouw kwaliteiten en interesses. In uniform, dus je gaat ook door een militaire selectie en krijgt een militaire basisopleiding. Dit kan als militair bij de Marine, Landmacht, Luchtmacht of Marechaussee. Door mee te draaien als professional krijg je de kans om je in je vak te ontwikkelen. Elke 6 maanden wissel je van werkplek, waardoor je veel verschillende aspecten van Defensie leert kennen. Bij Defensity College ontdek je wat je in je mars hebt.

Presentation

- Thursday 14th November
- Morning: 13.00-14.30

We are Cardano

Not the cryptocurrency, but a Rotterdam-based asset manager with a focus on risk management, asset management and pensions. We have been around since 2000 and with our pioneering spirit and expertise as a sustainable pension investor, we strive for better pension solutions for everyone. We are a bit stubborn and have a different view on financial markets and mathematical models. With a unique approach to risk, we challenge the status quo!

We help pension funds, insurers, banks and asset managers exceed the expectations of their participants and customers. We go beyond simply generating returns. With our services, our customers offer their participants or customers a high degree of pension security and convenience, while at the same time making a safe and sustainable world possible. In this way, we jointly contribute, as partners, to the quality of life of people.

An important trend in the market is that more and more investors are looking at the actual impact of their portfolio. How do you ensure that an investment yields more than just financial returns? It must lead to pension security and contribute positively to the transition to a sustainable world: creating impact. Together with our clients, we develop strategies for specific goals, with tailor-made solutions. Cardano helps to formulate policy on the impact the customer wants to make, ensures that this is possible through its solutions and reports on this so that it is clear what impact has actually been made. Our people are our strength. Our

specialists look at the bigger picture, understand the unruly context and goals of our customers. With their knowledge and innovative mindset, they solve complex problems. This enables our customers to offer their participants or customers more return, more impact, more simplicity and less risk. Every year, we let graduates write their thesis at Cardano and we have multiple junior vacancies for enthusiastic new colleagues.

At Cardano, various teams work with mathematicians, actuaries, econometricians, economists, physicists, quants, finance experts and all kinds of other specialists. We are relatively young, diverse, passionate about our profession and have teams with different nationalities. The Cardano Group now consists of 3 companies in the United Kingdom and 2 in the Netherlands. This brings us to 450 employees, EUR 60 billion under management for institutional investors and over EUR 100 billion in derivatives traded annually to manage interest rate, inflation, currency and equity risks for our clients. Despite our growth, one thing remains central: we strive for a robust, fair and stable pension system.

On June 11, 2024, it was announced that Mercer, part of Marsh McLennan (NYSE: MMC), reached an agreement to acquire Cardano.

Workshop

- Monday 18th November
- Afternoon: 13:00 - 16:00

**Erasmus
University
Rotterdam**

Are you starting to think about your next career steps but feel overwhelmed by all the information available? Are you wondering how to successfully start your career in the Netherlands? Or perhaps you're still in the process of discovering which job or career path suits you best.

At EUR Career Services, we are here to guide and support you on your career journey as well as on your study program choice. Through one-on-one career advice sessions, we can explore your career ambitions together and help you take the next steps towards achieving your goals. In addition, we offer interactive workshops on a range of career-related topics, including how to prepare for a job interview, effective networking strategies, writing a strong cover letter, building a professional LinkedIn profile, and identifying which career path suits you best.

Meet us at the ECD

Workshop

- Friday 15th November
- Noon: 11:00 - 13:00

Our focus is on providing personalized advice and coaching to offer you the tools for building a solid foundation for your future career.

Econometrics can be used to save lives! At the Erasmus MC, we apply econometric techniques to improve patient's outcomes and public health, with a particular focus on screening programs. These programs are crucial for the early detection and prevention of diseases such as cancer. As cancer can be treated much better when detected at an early stage, screening can save lives. Optimizing screening programs requires advanced statistical and simulation modeling.

Our workshop is designed to provide participants with insights into how econometrics can be applied in healthcare, specifically in the context of screening. Attendees will get an introduction into how screening programs can be optimized to maximize population life-years, while minimizing costs. Using real-world examples, participants will be introduced to the tools and methods used in our studies, including simulation models and cost-effectiveness analysis. The workshop will be taught by researchers from the Erasmus MC with a background in econometrics themselves.

Join us at the Econometrics Career Days if you want to discover how econometrics can play a vital role in healthcare and how you can make an impact in this dynamic field!

Meet us at the ECD

Workshop

- Thursday 14th November
- Noon: 11:00 - 13:00

Wenske Tuk
Chairwoman

Anna Grefhorst
Secretary &
Marketing Officer

Femke van Peyma
External Officer

Xavier Jaeger
External Officer

Krijn Vermeulen
Treasurer &
Marketing Officer

Thijs van der Windt
Day Coordinator

Lien Petit
Supervisor from the 59th
FAECTOR board

Dear student,

In this profiler, you have found the opportunities the ECD 2024 has to offer. All participating companies and parties are thrilled to meet you. Subscribe via ecdrotterdam.nl and take this amazing chance to Reach New Heights!

On behalf of the committee, we would like to thank all companies and people that are involved in this year's ECD. We invite all students to join us during the numerous events, whether it may be on the Impact Day, the Field Trip, our cases, our informal events or any of the other activities. We welcome you all to reach new heights and learn more about any of the companies and about yourself.

If you have any questions about the ECD, the program or specific events, we are more than happy to help you. Please contact us at info@ecdrotterdam.nl or via Instagram at [@ecdrotterdam](https://www.instagram.com/ecdrotterdam).

We are looking forward to meeting you and to seeing new connections being made during the ECD!

With kind regards,
The Econometric Career Days Committee 2024
